PROFILE

A highly motivated, detail-oriented front-end developer passionate about creating responsive, dynamic, and user-friendly web applications. Proficient in HTML, CSS, JavaScript, and React. I have a strong desire to continually improve and stay updated with the latest trends in web development. Eager to join a forward-thinking team in an entry-level role where I can leverage my technical skills, contribute to impactful projects, and grow professionally in a fast-paced and collaborative environment.

PROJECTS

Planto

Plant selling online website

- Designed and developed a plant-selling website from scratch using only HTML, CSS, and Javascript.
- It offers a seamless browsing experience for users to explore a wide variety of plants, from indoor succulents to outdoor garden plants.
- The site is fully responsive, ensuring an optimized experience across mobile, tablet, and desktop devices.

Tastemaker

A Restaurant Website

- Tastemaker is an elegant and visually stunning restaurant website designed to provide users with a seamless experience, from discovering the restaurant's menu to making reservations.
- Built using React and React Bootstrap the website offers an intuitive and engaging interface that highlights the restaurant's ambiance, dishes, and services.
- The website is fully responsive, ensuring that users can enjoy a consistent and optimized experience across all devices, whether they're on a smartphone, tablet, or desktop.

ThoughtSphere

A Blog Website

- ThoughtSphere is a modern and versatile blogging platform for writers, thinkers, and creatives to share their ideas, stories, and insights.
- Built with React and Tailwind, the website offers a clean and engaging user experience, making it easy for bloggers to create content and readers to explore diverse topics.
